

To whom it may concern: **Recommendation for Benjamin Tan En Zhe**

I am writing to provide a strong recommendation for **Mr Benjamin Tan En Zhe**, whose internship during his Bachelor of Engineering (Software Engineering) program at Monash University was supervised by me. I also served as one of the evaluators for his Final Year Project (FYP).

As his internship coordinator during his Bachelor of Engineering (Software Engineering) program at Monash University, I observed Benjamin's professional growth and technical capabilities firsthand. During the internship, he demonstrated strong initiative, quickly adapting to new technologies and tools while contributing meaningfully to project tasks. He consistently approached challenges with a very proactive attitude, communicated effectively with team members, and showed professionalism and responsibility in managing his workload. These qualities were affirmed by his on-site internship supervisor from Western Digital, who provided positive feedback during my site visit.

In my role as one of the evaluators for his FYP, I assessed Benjamin's ability to apply software engineering principles to a real-world problem, design a viable solution, and produce a functional prototype. He exhibited clear analytical thinking, strong problem-solving skills, and the ability to work independently and in a team while meeting deadlines and academic standards. His project reflected not only technical competence but also maturity in planning, organising, and prioritising tasks and understanding the core problem faced by its potential users. Benjamin demonstrated a willingness to seek feedback, continuously improve, and deliver high-quality outcomes. As a student, Benjamin demonstrated professionalism and respect towards lecturers and peers. He brings a positive mindset and contributes well in team-based environments.

In conclusion, I believe **Mr Benjamin Tan En Zhe** would be a valuable addition to any organisation. He has demonstrated consistent growth, good work ethic, and the potential to excel in a professional software engineering environment. I am pleased to provide this reference and am available to offer further information if required.

Thank you.

Yours sincerely,

Lim Mei Kuan (Dr)

Lecturer
